An Unparalleled Level of Care

The Betty J. Weiland Ambulatory Surgery Center at Northridge Hospital Medical Center offers the convenience of one-stop service, quality care by a highly skilled medical team, and the comfort and safety of a hospital setting. The center's state-of-the-art technology, combined with excellent personal care, consistently draws praise from patients.

After Your Surgery

With 19 recovery beds conveniently located in the surgery center, patients can rest assured knowing that the same helpful staff they met before the surgery will be there afterwards to assist throughout the recovery process. You can expect to go home an hour after your recovery. It is best to have a ride home and someone to accompany you after your surgery. We welcome questions from family members so they may better understand their role as caregivers at home.

After being discharged from the Weiland Ambulatory Surgery Center, all patients receive follow-up phone calls at home from our patient care team to check on their progress and to answer any questions about your continued recovery.

Members of our staff also speak several languages including English, Korean, Spanish, Chinese and Tagalog.

Before Your Surgery

You may pre-register for your surgery during the week prior to your appointed date. This includes:

- Filling out forms with the help of our friendly staff
- Undergoing any required blood testing , EKG, and Radiology tests
- Discussing any questions you may have about your surgery

Your Personal Care Team

When you need outpatient surgery, our team of medical specialists is committed to making your experience as convenient and comfortable as possible. Our board-certified physicians, registered nurses, surgical and laser technicians and other medical professionals all have many years of experience at the Weiland Ambulatory Surgery Center, and we demonstrate this expertise by providing seamless and compassionate medical care.
